

Vortrag

Im Rahmen des *Forschungszentrum* für die Modellierung und Simulation sozioökonomischer Phänomene (*MODUS*) spricht

Prof. Dr. Kevin Zollman
Carnegie Mellon University

Das Thema seines Vortrages ist

The Formation of Epistemic Networks
Montag, 20. Januar 2014, 16 Uhr c.t., S 72 (NW II)

In seinem Abstract schreibt Kevin Zollman: „*One important area of study for social epistemology is the social structure of epistemic groups – who communicates their knowledge with whom? Significant research has been done on better and worse communication networks, but less has been done on how a group comes to have one network or another. In this talk, I will present a number of results (some recent) from economics and philosophy about how individuals choose with whom to communicate. Understanding how individuals decide where to gain information can help us to design institutions that lead to epistemically more reliable groups.*“

Im Namen des Forschungszentrums lade ich ganz herzlich zu diesem Vortrag ein.

Prof. Dr. R. Hegselmann
